Euro-techno soundscapes, and epic virtual orchestra explorations 15 MP3 Songs ELECTRONIC: Virtual Orchestra, ELECTRONIC: Soundscapes Details: The music within 'Cyborg Scream' is a blend of Euro-techno art forms, orchestrated classical-jazz piano pieces, and new age synthesized pads. On Cyborg Scream, the Euro-techno art forms are songs 1 thru 4, and 8, 12, 13, and 15. Nam-Outpost Bastogne and Nam-The Ambush, songs 5 and 6, are soundscapes of my experience as a combat soldier in Vietnam, 1969. And yes, war is a living nightmare. Many vets tell me they experience these songs as 'therapeutic'. I orchestrated classical-jazz piano pieces, using synthesizers. I am referring to songs 7, 9, 10, 11 and 14. Close your eyes while listening to these pieces. Imagine a concert pianist, center stage, surrounded by a string symphony, and in some cases a chorus and bell choir. This is the fantasy of these songs. As I mention in my biography, in my wildest dreams I am a conductor!
