"As a member of the band Mix It Up,Ron J.Land has honed his skill as a great player,and now he is letting everyone know what he is capable of with the release of A Bluesman Sings The Blues. Though he plays the blues,Land does not play the kind of music typically associated with the genre. Though he may be influenced by legends like Albert King,Muddy Waters,and B.B. King,Land's style reflects more of a rock influence-a kind of postmodern blues sound. The 20 songs collected here feature both Land's talent as a singer/songwriter and his controlled guitar work.What's more impressive is that Land performs virtually all aspects of the compositions by himself,right down to the drum programming and production work making A Bluesman Sings The Blues a true labor of love for the artist."
