## **Mp3 Steve Dressler - Mind Transport**

## **DOWNLOAD HERE**

This music contains tracks that are meditative and party like. The sounds tracks of jazz, african, latin and middle eastern instruments I have compiled to create an orchestration that never existed. These sound tracks I think are truly uplifting. 12 MP3 Songs NEW AGE: Meditation, WORLD: World Fusion Details: Mind transport is about contemplation, a metaphysical experience. The music I believe could have a spiritual, transcending, mystical or meditative effect in your mind (oasis and beyond, mystery in dance and more). The sound tracks could be a platform to support you in your realization of your deepest and most precious personal thoughts, decisions or conflicts. These effects might relief you temporarily of stress and open relaxing path waves for you to think about your perceptions or could put to sleep. The music at first would be most effective when listened to at quiet hours of your day or night to receive the effects mentioned. Mind Transport is now on \*Apple Itunes for digital downloads and 38 other digital distributors. \*Link To Apple Itunes\*
