Honest lyrics set to soulful piano/guitar driven acoustic grooves - check out the organ, Wurli and Rhodes. 9 MP3 Songs POP: Delicate, JAZZ: Smooth Jazz Details: HI! Firtst I'd like to say, thanks for checking out my C.D. I wrote most of these songs within the past five years, and they've been inspired by some amazing life experiences I've been blessed to have...some great, some not so great. But the beauty of life comes through all kinds of ups and downs, challenges and ease, beauty and pain. I hope that comes through in the music. I currently live in Santa Cruz, CA where I am daily inspired by living in the trees that meet up with the ocean! Wow, my favorite combo for sure. I've spent my days doing all sorts of crazy things that starving musicians do, for instance, I've been managing a ropes course this summer and hanging out in the trees helping people do crazy things like jumping off a 100 foot tall tree! A good reminder that stepping out of the cliche "comfort zone" is really worth the ride. I've been writing some new stuff lately and hope to bring it to the table soon...I'm liking what's coming, but enjoy this C.D. for now. Peace, Wendy
