The new album from Jami Lula was released in February 2004. It is a collection of uplifting songs from a few live shows. And oh what range it displays for this artist of Inspiration. Opening the CD is "Spirit in the House" which actually started out as a sound check and morphed into the opening of the show. It is a song from "Something's Calling Me" that is a rocker speaking directly to the discovery of Spirit from within. "I done my time I'm so tired I give up on my simple mind It's not workin I'm no good I'm in need if I only could .. find the Spirit in the House" 2004 Beautiful Naked Body Publishing "There's a Healin Goin On" was a revelation in itself as it is normally an acappella piece. It flowed into an improvisational exploration that hit the mark. The song is about the healing of the past, by focusing on the differences in cultures as a blessing. "Let me walk to the banks of the river of Love Where the current runs deep baptized in the One Where there's no separation and the light is all we see Honoring all our differences and Love will set us free Mother Father God there's a Healin goin on Mother Father God there's a healin goin on Mother Fahter God there's a healin goin on Oh you Rock my Soul Oh you Rock my Soul" 2004 Beautiful Naked Body Publishing Masterpiece is an older song that you will love for its foray into the positive outlook on a relationship and life in general it is upbeat and enthusiastic in its approach. Martin Lund's flute virtuosity sails and soars into a passionate discourse of ecstatic release. "Masterpiece" "Well I love her feet I kiss em every chance I get She paints em different colors to remind me That it started out a little bit less obvious But I fell in Love with time and I fell deep And oh she's fine and she's the only one who doesn't even know Come and dance with me We'll paint our scenery Write out script as we eat breakfast in bed Our life is a masterpiece" 2004 Beautiful Naked Body Publishing The

CD closes with a cover of "In your Eyes" made popular by Peter Gabriel on his "So" album is yet another foray into the sublime. I hold that you will enjoy this record and allow it to inspire you to ever deeper explorations of your own Soul. Peace and Blessings!
