Show all album songs: Inside Stories Songs Details: There are singer-songwriters who use their craft to project a more romantic image of themselves. Hear them sing their songs and you imagine them as cowboys, drifters, gamblers, rebels on lifes highways, though the reality is generally far more prosaic. Wellington singer-songwriter Matt Hay is different. Starting from the dictum write what you know he has penned an album of songs that barely venture beyond his own suburban backyard. He doesnt pretend to be anything other than what he is; a balladeer from the burbs. And yet you will find melodies here that stick in your brain, choruses youll want to sing along to, lyrics that are timeless and poignant, offering quietly astute commentaries on lifes little ups and downs. With Inside Stories Matt Hay has crafted an album that can stand proudly alongside the best in roots rock. You may be reminded at times of John Hiatt, Jackson Browne or New Zealand's own the Warratahs, but youll also hear a fresh individual voice, singing stories he knows inside and out.
