Michael Compton's mood driven indie rock blends acoustic guitars, synthesizers and heartfelt vocals into a mix of seven dynamic songs about love. 7 MP3 Songs ROCK: Acoustic, ROCK: Emo Details: Dear _____, I'm a do it yourself kind of person. I make my own records with the help of my friends. I release them on my record label, missingrecords and I distribute them myself through my website and now through CD Baby.com. You wanna know more?.....hmmm let me think. Well on this record I enlisted the help of my friends Brent Carpenter and Jeff McNulty.(Bloodhag) We played together in a band called Eternal 13 which was hardcore thrash at it's finest. We recorded an album with Greg Williamson (prod. sunny day real estate) on extravertigo. I convinced the guys to celebrate my softer side with me and this is what we created. Brent played drums and Jeff added ambient synth to some acoustic songs that had been floating around in my head for some time. I called it invisible because the songs seemed to resonate the feeling I was having at the time that something was missing inside of me. The songs were a journey inside myself to unlock those secret emotions. Invisible is my first solo record. I have toured and played shows with some great artists such as Jen Wood, Elliot Smith, Rocky Votolato, Damien Jurado and the likes. I am huge fan of Bjork and Low and most any music that is heartfelt. I am working on some new songs for a new full length solo album which will be released on missingrecords in the coming year. If you are a fan of moody, beautiful, introspective music than I think you should check this out. Also check out my site missingrecordsand find out what's missing! take care. Michael
