Details: Wit whither wander is the first studio album of the newly formed revolutionary midwestern rock band known as The March. It is raw, unedited, unfiltered, unapologetic, political and cultural criticism at its very, very best. The songs are riddled with an original classical/rock cello and bouncing rhythmic guitars, banging drums and battle ready bass lines. Clever lyrics and melodies are mixed into the stew too, through a croaned out 'bob dylanish/Gorden Gano-vocalist. The effect the music makes is perfect for people feeling bogged down by the system. Do you want to find the courage to skip school or bail out of college? Yeah? Then listen to track seven. Do you want to find the strength needed to talk back to an asshole boss at a shitty job? or get off those poisonous prescription drugs? Yeah? Then listen to track 10. It could be called depressing, stuff no one wants to hear. But man somehow it still manages to make you tap your feet, nod your head, smile a thin little grin, and yeah... admit it! It makes you feel pretty damn good. So buy it and love it like it's your baby. [no pun intended.] D." Reviews: "Cool stuff Man!" The kid from that show with the long ass hair. "a new promising local artist." From the Onion's Schell beer music sampler.
