

Mp3 Diggabone - Headspacewalking

[DOWNLOAD HERE](#)

Innovative, yet soulful songs inspired by funk, rock, jazz, grass, and electronica, with vocal harmonies and improvised jams. 9 MP3 Songs ROCK: Jam-band, ROCK: Funk Rock Details: The nine tracks on the album, "headspacewalking" are good example the creativity and musicianship of Diggabone. The themes are as varied as the musical styles; it's a testament to Diggabone's potential. 1. Me And Mr Who: Steely Dan meets Zappa with a trancy interlude; it's about herb and liberty. 2. Diggin' Into The Wood: Midi guitar offers convincing hammond organ a la MM&W; it's a metaphorical beheading. 3. Hankerin': Another level of bluegrass with monstrous bridge/solo section and blistering finale; it's about urges taking over. 4. Easy Way Out: A Floyd-ish dark but covertly optimistic take on being abandoned; midi guitar stars as trumpet. 5. Yiffa: A trancy characterization of an underworld mad man who's life catches up to him; it features a superb guitar solo by Jeffree White. 6. Steal Away: A very non-traditional rock ballad about being weary of where your life is taking you 7. Willie: Diggabone's own brand of funk/jazz; it's a tongue and cheek view of the 70's Willie Nelson redneck image (Eric Bohne is a huge Willie fan). 8. Locomotion: Somewhat reminiscent of the Grateful Dead's "Eyes of the World"; it's a dreamer suggesting you follow your dreams. 9. Positive Lights: A glassy jazz number worthy of KMHD; it's about staying positive despite the negativity that seems to be increasingly prevalent. Diggabone is: Eric Bohne (Guitar, Vocals) Jeffree White (Guitar, Vocals) Carter Hill (Bass) Jim Maddox (Drums) For more information contact: Eric Bohne 503-281-9869 diggabone@hotmail.com
