Progressive pop 23 MP3 Songs POP: with Electronic Production, ROCK: Psychedelic Details: This CD features many of the fine musicians who once lived at 21 Walnut Ave in Stony Brook, NY. What has been said about it's two other sibling CDs i.e. It's Out There. and Go Figya, can be said of this disc as well. It's a funny eclectic mix of pop and rock and some cartoon. There are a lot of strong melodic ideas and the production level is high. The songs were written and recorded very fast so there is an immediacy about them that is not always easy to get. Another interesting thing is around this time my musical partners were starting to go their separate ways. So basically here are some of the last collaborations I would have with Nick DiMauro, Meryl Mathews, and Teddy Kumpel. A lot of bang for your buck on this CD!
