The first album release by composer and sound designer Peter Smith. Deep, dark and atmospheric soundscapes. 8 MP3 Songs NEW AGE: Ambient, ELECTRONIC: Ambient Details: Peter Smith presents Galaxy of the Mind, his first solo album available right now. An hour of ambient soundscapes composed, recorded and manipulated over the last four years, Galaxy of the Mind establishes Peter Smith as an alternate and unique perspective in sonic ambience. These ambient mindscapes were inspired by the huge metaphysical galaxy that lives within the human mind, explored for thousands of years by virtually every culture that ever existed. They have all explored and written extensively about topics such as the levels of consciousness, dreaming, dj vu, out of body experiences, awareness, flying and meditation. These are the elements and concepts that made this album. Each composition on this album began as a single sound. These sounds were considered an important signal, which was to be directed deep into the mind. After the sound was chosen, it was then manipulated, layered and processed to form the final signal. The final result is the very personal way of expressing the Galaxy of the Mind theme. - SmithComposition- March 19th, 2008 People who are interested in Lustmord Robert Fripp David Lynch should consider this download.
