

Mp3 Venomocean - Voyagev

[DOWNLOAD HERE](#)

Expertly combining drum bass beats with solid breaks and ambient nostalgic textures, Voyagev takes you from zero to everywhere in an instant. 5 MP3 Songs ELECTRONIC: Breakbeat/Breaks, ELECTRONIC: Pop Crossover Details: Consisting of a Vocalist and keyboardist, this production team is on top of the latest music technology. Venomocean's electronic synth formula and genre-morphing experiments spawn a new realm of experience in the depths of the Digital Laboratory that they call "The Studio". The combination of smooth vocals gracefully embedded into the digital dimension of computer music synthesis and technology is engaged to break the rules of time and space. Lead Vocalist and Visual designer, Barbara Babilonia began her experience in music at an early age. Her vocal talents were first introduced to the world of opera and classical music. The voice behind Venomocean is truly unique in the approach to cross the boundary between Music technology and lush vocals. Barbara's other talents include web, visual design and development. The look that is Venomocean, with their dark and edgy streamlined ambient atmosphere, is expertly put together by none other than the voice behind the music. Venomocean's music producer and lead keyboardist is known simply as Synthman. The Venomocean sound comes from a variety of inspiring sources from all ages of music history. Synthman is responsible for the sound creation and digital synthesis that hard-wires the music with modules of dynamic energy. Also introduced to music early in life, Synthman ensures that the future of electronic music stays ahead of the game. Venomocean is dedicated to advance the experience of music. Not only to be heard or felt, but embraced as well. Barbara and Synthman are always in the works for new and exciting music that has to be experienced through the audio frequencies projected from the power of high definition environments. In constant search of the future, Venomocean will be there to cross the gate of time to develop the pathway between time, space and audio energy.
