Sixteen tracks of hard rock music with elements of metal and hardcore punk, professionally mixed and produced. 16 MP3 Songs ROCK: Hard Rock, METAL: Metalcore Details: I'm Adrian Van Meter, a hard rock solo artist from Everett, WA. This is my debut album, "Veteran". It has sixteen full-length tracks of musical mega-insanity, produced in my basement studio. It's about 54 minutes long. The music itself is based on hard rock, but has elements of hardcore, punk rock, and metal. It's quite varied in style and subject. The emphasis is on the instruments, though I placed a lot of attention to vocals, as well. It has a heavy sound to it, but at times it can get really fast. The lyrical subject matter ranges from world affairs to ravioli. Every song was produced digitally using Logic 5 and brought up to the loudest possible volume. A lot of time was spent mixing this album of songs. The CD was replicated at Oasis CD Manufacturing and is a genuine CD, not a CD-R. It has everything that a CD you'd buy at a music store has - full-color artwork, shrink-wrapping, even the little booklet in the front of the jewel case. The best part is, it's only $7. Please, have a few samples. If you like what you hear, don't be afraid to support a good cause and get the entire CD. Thanks, and love.
