Smooth vocals, sophisticated songwriting and haunting lyrics over high-tech folk rock. 13 MP3 Songs
POP: Beatles-pop, ROCK: Modern Rock Details: Abandoned in the apalacian mountains as a baby by impoverished irish immigrant parents, Katie was raised by wolves until the age of 8. As a result of her unconventional upbringing, she developed various traits such as biting and territoriality... all tools of survival which generally get in the way of human relations. Despite her unconventional rearing, Katie blossomed into a young debutant once rescued by a fine middle-class family. But upon realizing that tea-length dresses made her legs look funny, she bought a guitar and learned to sing and decided to devote herself to a life of starving artistry. Several broken strings later, schooling seemed the best option... Katie has earned her degree from MusicTech College in Songwriting and Music Business and is currently living in the suburbs as a slave to white-collar pirates and screaming babies. Ever unphased, she has intricate plans to mutiny and record another album in the very near future.
