Here is a review of Raina's 3rd record, "End of Endless False Starts": End of Endless False Starts performing songwriter magazine Raina Roses new disc, End of Endless False Starts, features some fine acoustic-guitar picking from this Austin-based artist and, with its rootsy undercurrent, will certainly perk the ears of folk-pop enthusiasts. But its collection of musical novellas is really what sets this album apart from Roses singer-songwriter contemporaries, as these 12 stories enrapture the listener from first play. Roses vocal style, a mix of Kasey Chambers country twang (Desire) and Shawn Colvins girlish tone (Air and Water), serves as a fine vehicle to relay each vivid tale. Her melodies unleash a torrent of words, and her highly visual sonic portraits run long, sometimes up to six minutes, like the slow-burning, moody Misaligned Tires. End of Endless False Starts requires the listener to tap the brakes and tune in. Its not mindless, groove-oriented stuff here, so an appreciation for poetry is a prerequisite. LCB
