Upbeat, original pop rock with quirky lyrics and instant melodies. 11 MP3 Songs POP: Party Pop, ROCK: Modern Rock Details: If you've ever met the Clintons, then you know. It is virtually impossible to miss their point: be yourself and believe in yourself, be true to your roots, have fun! They not only convey this in person, but in their music, on the stage, and through their website (clintonsband.com), all in the name of building a community of music-lovers who care about what they hear and want to share with each other. The Clintons are a group of good guys who like to make friends and drink beer and act like goof balls, all the while making people happy. And while pop culture is turning out canned products like Clay Aiken and the mega-marketing machines are feeding society Jessica Simpson, the Clintons would prefer to hang out Montana-style, being good ol' boys with an occasional trip about the country to see their friends and share their lives with them in person. So, if you haven't taken the opportunity, take some time, get to know them. Guess which one is the farm kid and which one is from Wyoming. And after you've figured it out, check back often as there will be regular appearances around the state, music releases, and website updates. To join their email list (no spam, just stuff that matters in their world!), visit clintonsband.com.
