Through a nocturnal atmosphere, a musician weaves his way out of the night, drawing subtle impressions of Slowdive, David Sylvian and Nick Drake. 10 MP3 Songs ROCK: Acoustic, POP: 90's Pop Details: It's 3am. The street is silent. Nothing but the lush sounds of passing cars on the nearby high street. In an apartment separated from the rest of the world, a man faces a midnight of the soul and comes out triumphant on the other side of the night. This is the essence of "Outreach", the fourth Marching Band album, and as Oren Raab describes it, the best album the band has released so far. The Marching Band has been a solo outfit for Oren Raab since 1998, when he's decided he wants to form a band all by his own. Between 1998 and 2001, The Marching Band has released 4 albums, 2 EP's and one single. "Outreach", the fourth and most accomplished album, has become the first one to be distributed for sale. Following the success of his debut performance in May 2004, Oren plans to continue performing live in various venues in Israel, to promote Outreach and meanwhile to continue working on the elusive fifth Marching Band album, currently titled "Disappeared". "This is Pink Floyd plus a classical opera feel and minus the flying pigs... Just when you're drifting along on the melody, a jarring guitar crunch and squeal catches you off guard. Nothing is safe. But that's part of what makes it all so real... Many of these tracks create such an atmosphere: dangerous and seductive at the same time. Raab is more than a songwriter; he's an intelligent composer." Jennifer Layton, indie-music.com
