Fight The Online Battle... Or It Will Be YOU Who Looses! Unless you have never used the internet before, then it is unlikely that you havent heard of a blog before. Blogs have become so much part of the internet because they are easy for anyone to create and update even if they have no experience with graphics, HTML or in fact anything else which makes the internet part of an unknown goldmine. The real purpose of blogs is so that people can keep a record of what they are doing and their friends and family can read about them. It may sound pretty lame to you, but they were incredibly popular when they first started and now they are even more so. In fact, they were so popular that Google bought one of the biggest blogging platforms called Blogger as they were able to predict that this was the way that the internet was turning. With the entrance of Google into the online blogging arena, blogging exploded and many thousands of blogs were started every single day. While Blogger was becoming more and more popular, another blogging platform called WordPress was also exploding. The difference between them was that with WordPress you had total freedom to do whatever you wanted with it. What slowly happened was that lots of geeks started to use it and develop it further until it turned into an extremely powerful

piece of software. Which is really great for you because it means that you will have a huge amount of power behind any online marketing that you do which uses WordPress. Im not going to beat around the bush hear and tell you lots of technical information about why blogs are so great as it can easily be broken down into very simple terms.
