Writing Articles Is A Powerful Skill In Todays Internet Marketing World - This Product Will Help You Write More Articles Faster!! ---Perfect for Bum Marketers, Article Marketing and Content Creators! If you have been involved in internet marketing for more than a day, you probably already know how powerful articles can be. Even before Bum Marketing became popular, using articles as a marketing tool has been, and will continue to be, an effective and low cost way to draw traffic to your websites and/or affiliate promotions. Ok, understanding the value in writing articles, why havent you been writing as many articles as youd like to up until this point? If you know me, youll know that most of my software products were initially created for my own personal use. In this case, I was struggling to write and finish articles on a consistent basis. My answer was to create ArticleHelper. My problem was never a lack of ideas. I started dozens and dozens of articles. I just had trouble finishing them. Maybe you can relate to that. You see, what I used to do was open Notepad and type out as much of an article as I could in one sitting. But usually I forgot about that article until the next time I had a hot idea for a new one. I didnt want to go back to the older article until I typed out some of the ideas for the newer one. And I repeated this process over

and over again. To the point where I had many unfinished articles, and just a few that I had actually completed. So I brainstormed with my programmer to come up with an article writing and management tool to help me complete the articles I started. And so ArticleHelper was born. The main purpose of ArticleHelper is to help you finish more articles. That is as blunt and non-marketing fluff as I can be. I take pride in the fact that Internet Marketers not only like my products, but that they also use them to make their online businesses better. More money. Bigger lists. In less time and with less effort. Here are some of the features of ArticleHelper: - one central location for all the articles you are working on - running word count (it keeps track as you type) - ability to sort by article title, niche and word count - ability to quickly preview article - ability to enable/disable word wrap - ability to export summary into savable text file - ability to see the keywords you are focusing on - ability to document your author resource box Describing the features doesnt do the ArticleHelper justice. You have to see it to get a better idea. Tags: im, plr
