

Dynamics, Games And Science I

[DOWNLOAD HERE](#)

1 A Brief Survey of Focal Decomposition.- 2 Anosov and Circle Diffeomorphisms.- 3 Evolutionarily Stable Strategies and Replicator Dynamics in Asymmetric Two-Population Games.- 4 Poverty Traps, Rationality and Evolution.- 5 Leadership Model.- 6 Lorenz-Like Chaotic Attractors Revised.- 7 A Dynamical Point of View of Quantum Information: Entropy and Pressure.- 8 Generic Hamiltonian Dynamical Systems: An Overview.- 9 Microeconomic Model Based on MAS Framework: Modeling an Adaptive Producer.- 10 Equilibrium in a Tourism Model with Different Types.- 11 Computability and Dynamical Systems.- 12 Dynamics and Biological Thresholds.- 13 Global Convergence in Difference Equations.- 14 Networks Synchronizability, Local Dynamics and Some Graph Invariants.- 15 Continuous Models for Generic Evolution in Large Population.- 16 Forecasting of Yield Curves using Local State Space Reconstruction.- 17 KAM Theory as a Limit of Renormalization.- 18 An Overview of Optimal Life Insurance Purchase, Consumption and Investment Problems.- 19 Towards a Theory of Periodic Difference Equations and its Applications to Population Dynamics.- 20 Thompson's Group, Teichmüller Spaces, and Dual Riemann Surfaces.- 21 A Modified Model of an Edgeworthian Economy.- 22 Fractional Analysis of Traffic Dynamics.- 23 The Set of Planar Orbits of Second Species in the RTBP.- 24 Statistical Properties of the Maximum for Non-Uniformly Hyperbolic Dynamics.- 25 Adaptive Learning and Central Bank Inattentiveness in Optimal Monetary Policy.- 26 Discrete Time, Finite State Space Mean Field Games.- 27 Sample Exclusion Process: from Randomness to Determination.- 28 Universality in PS120 Fluctuations.- 29 Dynamical Systems with Nontrivially Recurrent Invariant Manifolds.- 30 Some Recent Results on the Stability of Endomorphisms.- 31 Differential Rigidity and Applications in One-Dimensional Dynamics.- 32 Minimum Regret Pricing of Contingent Claims in Incomplete Markets.- 33 A Class of Infinite Dimensional Replicator Dynamics.- 34 Kinetic Theory for Chemical Reactions Without a Barrier.- 35 Dynamical Gene-Environmental Networks Under Ellipsoidal Uncertainty - Set-Theoretic Regression Analysis Based on Ellipsoidal OR.- 36 Strategic Interaction in Macroeconomic Policies: An Outline of a New Differential Game Approach.- 37 Renormalization of Henon Maps.- 38 Application of Fractional Calculus in Engineering.- 39 Existence of Invariant Circles for Infinitely Renormalisable Area-Preserving

Maps.- 40 The Dynamics of Expectations.- 41 Dynamics on the Circle.- 42 Rolling Ball Problems.- 43 On the Dynamics of Certain Models Describing the HIV Infection.- 44 Tilings and Bussola for Making Decisions.- 45 A Hotelling-Type Network.- 46 The Closing Lemma in Retrospect.- 47 From Peixoto's Theorem to Palis' Conjecture.- 48 Dynamics Associated to Games (Fictitious Play) with Chaotic Behavior.- 49 A Finite Time Blowup Result for Quadratic ODEs.- 50 Relating Material and Space-Time Metrics Within Relativistic Elasticity: a Dynamical Example.- 51 Strategic Information Revelation Through Real Options in Investment Games.- 52 On Consumption Indivisibilities, the Demand for Durables, and Income Distribution. EAN/ISBN : 9783642114564 Publisher(s): Springer, Berlin Format: ePub/PDF Author(s): Peixoto, Mauricio M. - Pinto, Alberto A. - Rand, David A.
