Soothing, comforting solo piano lullabies. This hour long CD is carefully crafted with songs that gradually get slower and softer with each selection. Excellent for use with massage, this music is just as effective on relaxing adults. This music makes an especially beautiful backdrop for maternity and baby photos. Fabulous piano solos and lullabies for the smallest of ears - it's new age piano for babies... and adults. Selections from this album are featured on Whisperings Solo Piano Radio at solopianoradio.com. From the artist - After recording my first CD entitled First Dance (an album filled with songs of more up-tempo, technical piano music), I felt the music that I wanted to write for my second album had to be a change of pace. Combine this with the many requests I have received for more lullaby-type, relaxation music, and Close Your Eyes was created. Written mostly at night in front of the fireplace during the long Wisconsin winter, this CD is a reflection of my favorite time to create music, and inspired by a time in life when things were much simpler. Enjoy - there are more to come.
