Melodic pop rock with a bit of an edge and thoughtful lyrics. 10 MP3 Songs POP: Beatles-pop, ROCK: Classic Rock Details: Okay, it's hard to write a bio about yourself but here goes. I am a professional musician working in the New York City area. I grew up in a musical family and have been working professionally since I was 15. I studied the string bass in high school, switched to electric bass, and then added guitar, piano, voice and drums to my resume. Now I play mostly guitar in a very popular band called ETA. We've done gigs all over the country and our clients include the National Football League, the William Morris agency, Accenture, Verizon, and many others. I've always loved writing original songs and my CD "Plateau" represents the best of everything I've ever written. It is produced by myself and my good friend Al Renino (former bass player for "Mountain" Leslie West). So please give the mp3's a listen, and if you like it, consider buying it! you'll make an independant artist very happy. Thanks!
