

# Resource Ecology

[DOWNLOAD HERE](#)

Preface.- 1. Introduction on resource ecology.- 2A. Mechanisms determining large-herbivore distribution.- 3A. Spatial statistics to quantify patterns of herd dispersion in a savanna herbivore community.- 4A. Resource distribution and dynamics: mapping herbivore resources.- 5A. Foraging in a heterogeneous environment: intake and diet choice.- 6A. Predictive modelling of patch use by terrestrial herbivores.- 7A. Assembling a diet from different places.- 8A. Effects of temporal variability in resources on foraging behaviour.- 9A. Large-scale movements of large herbivores: livestock following changes in seasonal forage supply.- 10A. Relevance of key resource areas for large-scale movements of livestock.- 11A. Structuring herbivore communities: the role of habitat and diet.- 12. Prospects for further development of resource ecology.- List of references.- List of contributors. EAN/ISBN : 9781402068508 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Prins, Herbert H.T. - Langevelde, Frank van
