

Wordpress Profit System

[DOWNLOAD HERE](#)

WordPress Profit System is a simple, easy to use plugin that does exactly what most WordPress site owners want when selling digital products from their WordPress website. WordPress Profit System coupled with WordPress allows the user to:

- * Easily sell digital products with just a PayPal account -- PayPal is easy to use, but it doesn't provide a way to hide your Thank You page or protect your download links. WordPress Profit System makes it easy to do both. It'll hide your Thank You page so that only valid customers can access it and it will expire your download page and encrypt your download URLs so that your links can't be shared or posted on pirating forums.
- * Support multiple products in a single ClickBank Account -- WordPress Profit System lets you use separate sales, thank you, and download pages for each product you define. That means that you can place multiple products in 1 ClickBank account but still display individually crafted sales pages for each product.
- * Automatically cloaks your affiliate links -- The benefits of cloaking affiliate links have been discussed frequently on this forum and elsewhere. WordPress profit Systems AFFILIATE mode handles this for you automatically!
- * Protect Download Pages -- Download pages can only be accessed through a link that includes the buyer's purchase

information. These pages are also set to expire after a period you specify -- usually 3-5 days after the purchase. * Protect Download Links -- create ugly, cryptic, expiring links that cant be easily shared or posted on freebie forums * Hide a digital products actual URL -- anyone who sees your download link wont have a clue about what your download filename is. Everythings all screwed up with numbers, letters, and special characters that dont mean a thing to anyone but YOUR software. * Automatically generate PayPal, ClickBank, and EJunkie payment buttons -- saving you tons of time fighting PayPals button factory or customizing your own ClickBank buttons. Plus, because WordPress Profit System is a WordPress plugin it: * Is Easy to Install -- WordPress is known for its 5 minute install and installing WordPress plugins (like this one) is a cinch * Is Easy to Maintain * Makes it Easy to Add Content -- including new sales or review pages * Is Super SEO Friendly -- Google and Yahoo really LOVE WordPress * Is Easy to Customize -- both visually with WordPress themes and functionally with WordPress plugins. * Supports the largest, free, most widely used payment processor in the world (PayPal) * Supports the largest digital products affiliate sales network in the world (ClickBank) * Supports one of the largest digital products delivery sites in the world (E-Junkie) WordPress Profit System is a fantastic tool that turns any WordPress website into a platform for some serious Internet Marketing
