

Awesome Link Effect - Just 1 Usd - With Mrr

Show a set of webpages, large header:

Example: [Show page set](#)

ID:

The link list should be entered as in the example below. 'caption' and 'url' should not be changed. 'Google' and 'Yahoo' are the title of the webpages, with their corresponding links.

To make your own set of webpage links just enter as many lines as you wish in the format below, make sure that each one is ended with a , apart from the last one.

Click the example link for an idea of how this works.

Link list:

```
{ 'caption': 'Google', 'url': 'http://google.com/' },  
{ 'caption': 'Yahoo', 'url': 'http://yahoo.com/' }
```

Link code:

Give Your Website Some ALE No More Boring Old Links Opening In A new Window Now You Can Keep Your Visitors On YOUR Website Regardless Of Where You Link To How many visitors have left your site never to return after clicking on one of your links to an external webpage? How many times have your visitors got lost on your site when trying to view videos or images and they forgot where they came from? How many times have you had to give up the URL of one of your 'secret' sites because it shows in the web browser address bar? How many times have you fumbled around putting together pop up windows or the like to keep your visitors on your site? Well those days are over. Now you can have pages open over the top of your website without fear of losing visitors. Let me give you an example: Click [HERE](#) for the old way. Click [HERE](#) for the ALE way. Now which one was more likely to keep visitors on YOUR site?. That's not the only option available, try this effect Do you have a set of webpages such as instructions or a set of videos to follow?. Why not have them all viewable in order with 1 link, [LIKE THIS](#) Maybe you have a set of images you want to show [LIKE THIS](#) All these effects and more (a total of 6 in all) can be easily created with ALE. ALE is a script that runs on a php server that gives you a set of forms, you fill in the details for the effect you want, press a button, and up pops the html code you paste into your webpage for the link. Like so....
