Zen and Blues meet in a quiet deep emotional dialogue of electric guitar and rhodes piano 8 MP3 Songs
NEW AGE: Meditation, BLUES: Mellow Blues Details: Zen Blues came to us as a complete surprise. It is exactly what the name suggests: Zen - time, meditation, reflection, Blues - passion, emotion, feeling. This is the first Blue Star album without rhythm section. It is only electric guitar and fender rhodes piano on a journey to the inner spaces. For us it was always clear, that the blues is much more than "cryinin my beer". Zen as well is nothing that hides behind the walls of a monastery. Zen music and the blues are both rooted in pentatonic scales. But this album is not about scales - it is about the wide open landscapes of both the inner and the outer world. It makes you feel good. Very good! Listen to the soundclips. But be warned: You might want it. Thats why we call it Electro Magnetic Music. Addictive! Like it? If you tick the way we do, you have already waited for this album. A long time. We did not plan this album. It came to us as a gift. We were actually working on completely different material. Then Zen Blues happened. Now we share it with you. Have fun!
