A groovy mix of Rock, Pop Country written recorded by a singer /songwriter from new jersey with international musicians in Switzerland. 12 MP3 Songs POP: with Live-band Production, COUNTRY: Modern Country Details: Eric St. Michaels USA/CH Situations and conversations that emerge out of a working class life are mostly the subject matter of Erics songs: Bringing an original mix of Rock, Country Pop with a modern groove to 100s of towns and cities around the world both solo and with his band has given Erics career a troubadour-like foundation. I have a deep respect for music history, but this has never kept me from embracing new developments. I think that this has given my music a contemporary feeling backed with substance. Taking the sound out of his head and bringing it to life has always been the thrill of song writing and Erics driving force. Eric tries to be inclusive in sharing that sound with the listeners. Even if sometimes he has to announce to his Audience Here comes an experiment! With the release of his first solo album Rise on BMG / CH in 98 Eric found that making the journey from Singer in a band to Solo Artist was not easy: The common bond and support that comes from five guys sharing responsibilities now looks like a luxury. Building up enough belief in ones self to take on the task of living as a solo musician can be a big challenge. But the support of the listening public has always kept me going. Having had a brief taste of the pop star life as a young singer in NYC being produced by Paul Stanley and then later touring and making records in Europe with the rock group China, Eric learned that the only way to sustain a career past the Industry Imposed Sell-By Date was to stay fit and become a competent songwriter and performer: You have to reach as many people as possible and build a fan base that doesnt care about the music bizz flavour of the month.
