

Mp3 Jeza - Jeza Wined Up

[DOWNLOAD HERE](#)

Crossover jazz/rock/pop .. It's the toe-tapping rhythms, inventive melodies, thoughtful lyrics, enigmatic vocals, and quality of production that give Jeza music the edge over much 'off the peg' on-line music 12 MP3 Songs POP: British Pop, JAZZ: Jazz Vocals Details: Bronson Hermuth From start to finish the music of Jeza wanders musically and instrumentally thru a gauntlet of stylings and 'feels'... Recorded by an International cast of players who 'get it' when it comes to helping Jeza's songs come to life. Jeza has his own distinct vocal style and a very cool sense of phrasing that he 'signs' each of his songs with. There is an International feel and sound to his music that moves freely across all borders... *MUSIC INDUSTRY CONNECTIONS* - JUNE 2000 'Jeza's got a striking and easy to remember name and his demo submission presentation is great, he's made an effort and that will draw him a lot of attention from A&R eyes and ears! Then when the demo starts, well, the words 'seriously cool' spring to mind. This is spellbindingly good! This guy is something else! He has got soul! This is awesome, melodic, rhythmic, passionate, emotive, meaningful joy. Beautiful songs, beautiful music, beautiful vocals. A magnificent blend of reggae, jazz, funk and folk with a stroke of genius. This is music for every part of your life from your first love to your happiest and saddest moments. This is the music of memories to last a lifetime. Mere words cannot do this music justice, the music speaks for itself'. The MyT - UK To me this is an example of why the record industry is so dumb. These tracks are professional in every sense, catchy without being overly commercial, and well written without being over complicated. I myself would listen over and over, but presuming Jeza isn't on a record label, it's criminal. It's all about who you know, and not what you do, because if it were the latter, Jeza would be a household name by now.
