Tony McBrayer Low Earth Orbit is a band for the new millenium! Including New School Metal and Rock with an Old School Twist! The guys have just finished recording their new cd at Nightsong Studios , Knoxville,TN. with Anthony Mcbrayer and Jesse Jones co- producing the cd titled "Pushed". Low Earth Orbit began as the musical vision of guitarist/songwriter Anthony Mcbrayer in 2000. after starting out, under a different name went thru several line-ups before their present line-up. with new drummer Dan Milas on drums (from Chicago) and Knoxvilleian Josh Calhoun on vocals everything began to change. It only seemed right to change the name states Mcbrayer , we tryed really hard to make things work with our old line up but the pieces didn't fit. Once Dan came into the camp everything changed he made it fun to play and write again! We have been talking with Mike Allen (CEO) of Maniac Records I really feel like the future holds so much in store for us!We couldn't have even imagined!!! You know in the previous line-up we rehersed 5 times a week! We are no stranger to hard work and a little DIY,and to this day we hold true to that ethic. I think alot of heads will be turned with this music! The people who have supported us , and the people we have lost along the way.Makes me feel like anything is possible. With the scene opening up in our hometown of Knoxville the way it has,people like Renee' at knoxshows.com,Mike Gibson at the Metro Pulse. It would seem the sky is the limit for us.
