

Therapeutic Resistance To Anti-hormonal Drugs In Breast Cancer

[DOWNLOAD HERE](#)

Part 1: OVERVIEW. 1.1 Endocrine resistance in clinical breast cancer; John F Robertson. 1.2 Endocrine resistance in experimental breast cancer; Robert I Nicholson. Part 2: NEW THEMES IN ENDOCRINE RESISTANCE. 2.1 Co-activators / co-repressors and endocrine resistance; Simak Ali. 2.2 Antihormone-induced gene changes: consequences for the development of drug-resistance; Julia Gee. 2.3 Altered signal transduction pathways: impact on ER signalling and expression; Dorraya El-Ashry. 2.4 Epigenetic alterations in DNA methylation in breast cancer; Martin Widschwendter and Heidi Fiegl. 2.5 Antihormone-induced tumour progression; Stephen Hiscox. 2.6 Influence of the tumour microenvironment; Rosemary Walker. 2.7 Stem cells; Rob Clarke. Part 3: NEW ADVANCES AND INNOVATIVE THERAPEUTIC APPROACHES. 3.1 DNA profiling; Dennis Slamon. 3.2 Synthetic lethal approaches to target gene discovery; Alan Ashworth. 3.3 Intelligent combination therapies; Stephen Johnston. 3.4 Novel targeting approaches; Paul Workman. 3.5 Future treatment of endocrine-resistant breast cancer: how basic science can guide clinical development; Elizabeth Anderson. EAN/ISBN : 9781402085260 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Hiscox, Stephen - Gee, Julia - Nicholson, Robert I.
