Ethereal is poetic and relaxing, with Amethyste's peaceful melodies and exciting ambient backgrounds.

15 MP3 Songs NEW AGE: Ambient, EASY LISTENING: Mood Music Details: In October of 2005, a very fine musician from Germany ( Gunnar Spardel of Tigerforest ) caught Amethyste's attention. One of his wonderful song "Summer Rain" was playing on the player and she HAD to click on the "view" button.

Suddenly, she was transported into a new dimension where music has a soul and feelings. A place where she secretly wanted to reach for so long... She was compelled to write him a note telling him how wonderful and beautiful his music was. He replied to her later that day that he really liked her voice and if she was interested into collaborating musically to please let him know. She was mostly surprised that he replied to her kind message because she felt that his compositions were just so spectacular, somewhat intimidating at the same time. It seems that everything took an uplifting turn in 2006 when Gunnar and Amethyste started to collaborate more extensively on several projects ranging from Trance - Dance to Ambient. They finally decided to meet in February of 2006 in NYC, then shortly after their first meeting, Gunnar came to spend 3 months in the USA focusing on music composition and production. Their love for each other fueled the creation of Amethyste's debut CD titled "Ethereal". Gunnar's extreme composing ability really showcases Amethyste's soothing and dreamy ample vocal range. The beautiful music that Amethyste and Gunnar Spardel create have been heard in radio stations in Europe as well as many internet radios. Ethereal warms the heart and shines light upon their acclaimed and distinctive style of music.
