THE TEXT BELOW IS FROM THE BOOK OF MIND Mind in its original form has 5 properties. All these together make up the composition of mind. The 3 properties of sound are sound, light, magnetism. The 4 properties of light are sound, light, magnetism, motion. The 3 properties of magnetism, motion, life are somewhat referred to as mind. The property of mind as motion in things causes movement and changes along the infinite scale of sound, and light, and mind itself. By analogy the bow is sound, the arrow is light, and motion gives movement to the arrow. The 3 properties of mind, which are magnetism, motion, life are combined in various ways with sound and light to form an infinite number of things. For a being to be alive all the 5 properties of mind has to be present, which are sound, light, magnetism, motion, life. Even though there is mind in all things, the presence of mind in animate matter is that of magnetism. Everything has substance, form, density, texture, mass. The substance is due to the presence of sound energies within the thing. It's color, heat, etc, is due to the presence of light. It's properties of mind whether either magnetism, motion or life, gives it mind. The unique characteristics of mind in sound is magnetism. The unique characteristics of mind in light is motion. The unique characteristics of mind in mind is life FROM THE BOOK OF MIND, WITHIN THE BOOKS OF SOUND, LIGHT MIND VOL.1 BY KEN NUNOO
