ELECTRONIC: Industrial, ELECTRONIC: Experimental Details: The world requires definitions, so I will do my best. Influences range from Industrial, noise, experimental, and techno for content, and post-rock for structure. Saemskin is the only electronic artist today who doesn't suffer from the dreaded verse-chorus-verse stagnant way of constructing songs. His music is an exploratory transitional flow of one idea to the next. The results of which can be quite intriguing. What you will hear is a percussive intensive drive of emotion. saemskin.com
