"The book by Levin and Becker entitled A Public Health Perspective on Women s Mental Health will become a primary source for everyone interested in women s issues. It is a comprehensive and unique overview on all aspects of this rapidly changing area. It is equally useful for both clinicians and policy makers, and provides detailed insight into issues that are often treated with a summary overview. This book includes a review of the epidemiology of women s medical and mental disorders throughout the life span and current information on obvious areas of interest, including eating disorders and depression. It also includes a public health perspective on issues less automatically thought about from a female perspective, including HIV/AIDS, epidemiology of incarceration, managed care organizations, substance use, and menopause. I would strongly recommend this book for anyone interested in the health and mental health of women." Ronald J Diamond M.D., Professor, Department of Psychiatry, School of Medicine and Public Health, University of Wisconsin "This timely resource offers a holistic examination of one of the most troubling failures of our health system the persistent denial of mental health as a critical component of health while also contributing to the growing body of evidence on the importance of women s health, not only to women themselves, but to the safety and security of their families, communities, and society at large. Bravo to Drs. Levin & Becker for tackling this head on in a thorough, elegant, and straightforward manner. This book needs to be in the hands of every graduate student, educator, and professional interested in improving health locally and globally". Donna J.
