Details: Living on a farm in upstate New York, I have come to appreciate the many unique and comforting sounds of water; as a babbling brook, or a gentle Spring rain. These magical sounds help to transport one to a place of serenity and tranquility. This CD includes 6 diverse water sounds, recorded spontaneously in nature, with no additions or alterations. They can be used for relaxation, or meditation, or just to create a feeling of being at one with Mother nature. Allow the voices of water to relax you, and carry you to a place of peace.
