A collection of mostly smooth jazz with some straight ahead and latin jazz selections 10 MP3 Songs  
EASY LISTENING: Background Music, JAZZ: Smooth Jazz Details: Hi there, Thanks for checking out my CD, FOR THE RECORD. I have had a ball playing these songs as piano pieces over the years. I always heard the entire arrangement in my head. I thought it would be fun to bring these arrangements to life. Thus began the arduous task of actually arranging for performance all the parts for each song. I have performed in numerous bands and ensembles from rock, jazz, country, latin, to some orchestral works, and even some remakes of famous Broadway musicals. I love just about every type of music and enjoy listening to all of it at one time or another. The CD has a smooth jazz feel with some strong latin influence on the several selection. There is also a straight ahead jazz tune. I think you will find my music uplifting. Its enjoyable as background for your party, your workday, in the car, or for serious listening in a quiet setting. All the Best to You, Tim
