It's a synth-rock revolution. 5 MP3 Songs POP: New Wave, POP: Power Pop Details: From Portland Oregon. Band formed by ex Dandy Warhol Eric Hedford on keys and vocals, Scott Fox on guitar (Satan's Pilgrims, Crackerbash), Paulie Pulvirenti playing drums (Elliott Smith), and Juliette Jones on bass. CD Baby Review: "Revisiting the glory days of synth-rock, adding post-punk influences, and then ensuring complete and total satisfaction with a sugar gloss, here is sticky, sweet rock that is undeniably catchy. It will make indie-rockers swoon and fans of the synth quickly latch on. Creating a wall of melody with their synth-drum-bass-guitar set-up, this quartet creates songs that would jump out at you even if they were just instrumentals. But, with the addition of the smooth, crystal clear lead vocals and spot-on backing vocals, as well as smart, well-written lyrics, the songs are even that much stronger. Sing along, dance, or bop your head to these glowing, brightly powered songs that exemplify how a rock band can sugar coat it and make it enjoyable for everyone without losing anything."
