An exceptional blend of intellect, comedy, style, and grace for Hip-Hop fans. Music for the times, Hip Hop for life. 16 MP3 Songs HIP HOP/RAP: Alternative Hip Hop, URBAN/R&B: R&B Rap mix Details: WHAT IT DO!!!! This album sounds like it comes from another place in another time, in terms of location, that statement is not far off the mark. Nobodies from Nowhere is what the members of Lotus will tell you if you ask them who they are and where they come from. Over Washington's Cascade Mountains and across the plane of the Columbia Basin, nearly 300 miles from Seattle, a matter of minutes away from the location where compact discs were invented and a short drive from the Hanford Site where the U.S. Government built the atomic bomb, is where Lotus makes music. It's been 2 years since the group formed, "Mark" is the Lotus fellowship's first disc released from the Bossalaus Trilogy. "This album serves as an introduction to the conversational and enjoyably, random style of Lotus. We kept the album simple and discreet in style as well as production value. There were so many ideas and complexity that we divided across future projects because we didn't want to give too much, too soon. With very little compression the overall sound of the album is very close to the earth and warm to highlight the natural dynamics. This is where the beginning comes from; growing up in farming communities gives you a respect for the soil and the "bigness" of it all. It has been a united beginning for all of us and the music we put out are like our crops, and in terms of promotion and name recognition Mark of the Lotus is a seed crop of sorts, exactly what the title implies, a mark, a calling card, etc. When Bossalaus comes to a close, the following album will be a rebirth; a new season."--Lotus Currently the group is preparing websites and producing albums for other artists on their label, most of which will be released simultaneously along with Bossalaus 2 next year.
