Easy Listening,Adventures for the mind. A vast array of sound styles,and fantasy moods. Unusual 22 MP3 Songs ELECTRONIC: Virtual Orchestra, EASY LISTENING: Mood Music Details: This album was created for a future Movie score. The movie hasn't been created yet, but you can hear the music right now until it takes shape. Maybe it will be used in a Movie you are putting together that is looking for an original score by William Verkler. Please give this wall flower album your ear. You will not be disappointed. I used a Roland X8 FANTOM keyboard,Drum kit,and various other Roland synthesizer modules and Roland Handsonic components,as well as Yamaha,and Casio keyboards. I can really get creative with all of these tools on tap. I love all sorts of music styles. I'm branding my Electronic series of Music albums as "Electronic Symphonic" I think about scenes from a movie when I create my music so it can easily be adapted to many types of Movies. The first Movie my music has been applied to is called Lia Scott Price's "Dominion" The original score is available here on CDBaby,see the links. The DVD Movie "Dominion" is now available through , Customflix.com/208472, for \$18.99. I've been doing a lot of sound effects work for the movies. I may put the best of them on CDBaby soon.
