

# The Challenge Of Highly Pathogenic Microorganisms

[DOWNLOAD HERE](#)

1. The Anthrax Capsule: Role in Pathogenesis and Target for Vaccines and Therapeutics.- 2. Proteomic Studies of *Bacillus anthracis* Reveal in vitro CO<sub>2</sub>-Modulation and Expression during Infection of Extracellular Proteases.- 3. Dynamics of *Bacillus anthracis* Infection and Control Mechanisms.- 4. Survival and Trafficking of *Yersinia pestis* in Non-Acidified Phagosomes in Murine Macrophages.- 5. The Inverse Relationship between Cytotoxicity of *Y. pestis* and its Virulence.- 6. The NlpD Lipoprotein of *Yersinia pestis* is Essential for Cell Separation and Virulence.- 7. Dissection of the Functions of the IgIC Protein of *Francisella tularensis*.- 8. *Yersinia pestis* Lipopolysaccharide in Host-Pathogen Interactions.- 9. The Interactions between Pathogens and Dendritic Cells: From Paralysis of Cells to their Recruitment for Bacterial Colonization.- 10. Comparative Approaches to Identify Host Factors Specifically Targeted by *Yersinia pestis* during the Infectious Process.- 11. Poxvirus Entry into Host Cells.- 12. Role of A33R Amino-Acid 118L in the Interactions of Vaccinia Virus with the Host.- 13. Inhibitors of Innate Immunity from Vaccinia Virus.- 14. *Brucella* Species Synchronize their Life Cycle to the Gestation Cycle of their Ruminant Hosts.- 15. MMP-9 as a Marker for Vaccinia Virus Related Encephalitis.- 16. Epidemic Cowpoxvirus Infections in Germany.- 17. The Two Partner Secretion Transporters of *Yersinia pestis*: Cloning, Immunogenicity and in vivo Expression Following Airway Infection.- 18. Genetic Detection of Vesicle Forming Pathogens by Arrayed Primer Extension (APEX).- 19. Subtyping Biothreat Bacterial Pathogens.- 20. A Rapid Method for *Bacillus anthracis* Genotyping.- 21. Tularemia A Disease with an Uncertain Impact on Public Health.- 22. Consequences of Antibiotic Treatment of *Francisella tularensis* Airways Infections.- 23. Novel Live Vaccine Candidates against Airborne *Francisella tularensis*.- 24. Effect of Disruption of *mgIA* on the Virulence and Immunogenicity of the *Francisella tularensis* Live Vaccine Strain (LVS).- 25. Data Mining, Bioinformatic and Immunoinformatic Analyses of *Francisella tularensis* Schu S4 Genome in Search for Novel Vaccine Candidates.- 26. Modified Vaccinia Virus Ankara (MVA) based Vaccines Immunostimulatory and Protective Capacity.- 27. Therapeutic Potential of Vaccinia Hyper Immune Sera in Mouse Models of Lethal Orthopoxviruses Infection.- 28. A Live Plaque Vaccine Candidate with Improved Safety and Immunogenicity.- 29. Protection against Plague Afforded

by Treatment with Polyclonal LcrV and F1 Antibodies.- 30. Combination of Anthrax-Toxin Neutralizing Antibodies: Analysis of Synergism/Antagonism Effect.- 31. The Efficacy of Antibiotic Treatment to Cure Guinea Pigs Intranasally Infected with Bacillus anthracis Spores.- 32. Reverse Vaccinology in Bacillus anthracis. EAN/ISBN : 9789048190546 Publisher(s): Springer Netherlands, Springer Science & Business Media Format: ePub/PDF Author(s): Schafferman, Avigdor - Ordentlich, Arie - Velan, Baruch
