

Semiconductor Nanostructures For Optoelectronic Devices

[DOWNLOAD HERE](#)

From the contents: Introduction.- Vapor-liquid-solid growth of III-V semiconductor nanowires.- III-V semiconductor nanowires on Si.- Hierarchical nanowires: Controlled growth and applications.- Wide bandgap nanostructures for visible light emitters.- Hybrid semiconductor nanostructures with graphene layers.- EXAFS characterization of semiconductor nanomaterials.- Lasing characteristics of single and assembled nanowires.- Nanophotonic device application using semiconductor nanorod heterostructures.- Semiconductor nanowire photodetectors.- AlN nanowire LEDs. EAN/ISBN : 9783642224805 Publisher(s): Springer, Berlin Discussed keywords: Halbleiter, Nanotechnologie, Optoelektronik Format: ePub/PDF Author(s): Yi, Gyu-Chul
