"Who Else Wants To Build Insanely Profitable Affiliate Sites, Suck In Free Traffic On Autopilot And Ramp Up Your Weekly ClickBank Checks!" In Minutes From Now, Discover How To Achieve Page 1 Rankings on Google In 3 Hours or Less "Set It And Forget It" Style! Dear Visitor, Are you tired of buying courses after courses from so-called marketing "experts" that promise you will make truckloads of cash but don't live up to their promises? Are you sick and fed up of trying out short-lived methods only to find out you were late to the party when everyone else already cashed out from the 'fad'? Then it's time to stop whatever you're doing right now because it's obviously bringing little or no results to your bottom-line. When I first went online in search of Internet riches, I was just like you. Naturally, I bought into a "make money" course to learn how to make an extra buck or two online. And guess what? I DID make an extra buck or two online, but that's after spending thousands of dollars on buying other people's courses - one after another! I was lining up the pockets of other so-called marketing "experts" and making them rich in the process, at my expense. What I didn't know at that time was that there are a lot of people who make their money simply by just teaching other people how to do the same! To me, this is no different than the

modern day pyramid scheme, or... "The Modern Day Gold Rush!" I bought into one course after another, each teaching conflicting advise and while I did make some money off doing certain methods I've picked up, they fizzled just as quickly because the methods were just 'fads' or one-trick ponies. Was it frustrating? You bet it was! I had a ClickBank account (today I have several) and like many other courses taught me to, I opened a free account with them so I could promote the abundance of choices of products in the marketplace as an affiliate. Only problem was: "how the hell do I start stuffing in cash into my ClickBank account?" With hundreds of thousands of affiliates around the world crawling the same marketplace, this meant I was in for stiff competition. At this point, I was already flushed out on my savings to buy another "expert course". Even if I had the money back then, I wasn't so sure I'd spend only to be disappointed again. I tried so many marketing tactics and they didn't pan out. Up to this point, I think you can relate very well with me. But here's where I passed the line. I didn't call it quits nor did I give up. You know what's really strange but a gift at the same time? Gut feelings. Logically speaking, there were so many reasons for me to give up and try something else. At this stage, making money elsewhere seemed so much easier and a very promising option indeed. Failure after failure, I would have expected myself to quit, really! But I didn't. Because my gut feeling told me that it's too good to pass up. I know that the abundance of wealth is staring back at me every time I log onto the Internet, I just need to figure out how to do it correctly! And one thing about me at that time is, I refused to sell a "guru course" of my own even though I thought I would make an easy small fortune, just like almost everyone else who seems to be doing so (and a tempting payback for the courses I've spent my own little fortune on). But I am a person of my principles, and I refuse to sell anything that doesn't work, especially since I know it to be true! "Fast Forward..." I was promoting a product as an affiliate on ClickBank. It was probably beyond my 100th time trying to make money online and my desperation to make things work led me to try so many different things. And one day I hit 'paydirt'. I wasn't too quick to be happy because in the past, I had make some money here and there but they usually didn't last long. Then another sale came in the next day. And then another. And another. And another. Every day. I grew confident but I didn't want to get too arrogant just yet. I duplicated the same thing I did with another affiliate site... and guess what? It started to roll in more cash into my ClickBank account too! Finally... I cracked the code! And because the method brings in predictable results I can confidently call it a system. In the end I discovered how to build affiliate sites profitably after so long and I am thankful I didn't give up before this. And here's what else you need

to know: The conception of this system has little to do with the materials I've learned from the gazillions of "courses" - this gets me riled up sometimes even now, but I've taken very little lessons from those courses I've spent thousands on. And when I 'cracked the code' I found it ironic that it had little to do with what I know before this! It takes little time to implement - forget spending months to drive in substantial traffic or even weeks to rank your sites for top keywords on Google. I found an easier way to get your affiliate sites to rank on Page 1 on Google in 3 hours... or less! Irrelevant of competition - contrary to what I said earlier about competing with hundreds of thousands of affiliates, I gradually found out most of these people were just like me. They had next-to-no clue about making money online either! And when you unearth my accidental discovery, this will give you an instant edge over an army of competitors! I don't pay for traffic - I used to pay for traffic last time believing that if I wanted to succeed I have to pay for it first. Well that has its merits but only if you know what you're doing. And if you know exactly what to do to get traffic to your sites, and you have a choice in not paying for it... well why not? Doesn't require a genius or PhD to figure it out - there is nothing to "figure out". I've already done that for you. Personally, I like to keep things simple. I hate complicated stuff. If you're fed up of hearing 'experts' talking in jargons you don't understand, and you're tired of money-making fads... then this is your ticket out of all these B.S. and I'm going to show you where 'X' marks the spot! "Introducing CB Paycheck Secrets..." Total Running Time: 1 hour 25 minutes 13 seconds Finally... Here's A Real Course That Shows You Exactly - Step-By-Step - How To Make Real Money And Line Your Own Pockets With Fat Checks From ClickBank... Week In, Week Out! While this course is designed specifically for ClickBank affiliates, the principle in general works with affiliate marketing of any form. Even if you promote affiliate programs that are 3rd party or in-house, this will still work. However I like ClickBank because it's convenient, there are new products added around the clock, and you can easily pick and promote any products from any niche - all in one place. The core of my program is to learn how to build insanely profitable affiliate sites for yourself, achieve Page 1 rankings on Google in 3 hours or less... and do it "set it and forget it" style! What You Also Need To Know About This Course: This is NOT a course on one of those money-making fads. You've read my story. I am into building a business that lasts. I hate the idea of working my butt over and over again and that said, I hate buying into anything that teaches how to cash in on short-term trends. This is NOT some overpriced E-Book. In fact, I recorded my teachings in video form so I explain to you better. I'm sure you've read tons of E-Books that give subjective, vague explanations. I've been there too

and this is why I prefer to do videos to educate you better. This is also NOT a course on how to make money in the "make money online" niche. A lot of marketing courses out there seem to direct other people into the same crowded, over-saturated "make money" niche... while the rest of the ocean is abundant! Conversely, my methods in just about any other niche with a demand. I hope I've got you excited already. :-)

Here's A Glimpse Of What's Inside:

Video 01 - Market Research Running Time: 12 minutes 08 seconds Description: Stop hanging around the "make money" niche! This place is getting saturated by the hour. So many 'guru courses' teach their own students to come here first, only to be beaten and battered by superior marketers. Learn how to find profitable niches that are untapped with minimal competition, and product to promote. Here I take you through several free or low-cost, readily available tools that will help you identify what exactly the market wants, trends and whether this niche is bound to convert or not.

Video 02 - Keyword Research, SEO Competition Analysis and Domain Secrets Running Time: 13 minutes 51 seconds Description: Every time I come across a sales letter that says 'No Google needed' I cringe. This is what a lot of "make money fad" courses are about. If you want to learn how to build a business that lasts, then here's how to generate a massive keyword list at a click of a button and uncover low SEO competition keywords that will help secure high rankings on Google! There's also a little secret about domains that not many know about, which I discovered by accident! This little strategy alone will make sure your affiliate site shoot up the rankings with minimal to no backlinking efforts required.

Video 03 - Related Keywords Running Time: 03 minutes 06 seconds Description: Continuing from where we last left, in this video you will learn how to find related keywords to your primary one to make your website keyword rich so that Google will have no choice but to rank your website. This will also allow you to generate traffic from other keywords that we're not primarily targeting. This is long-tail keyword... being passive!

Video 04 - Wordpress Installation Running Time: 03 minutes 59 seconds Description: How to redirect your Domain DNS to your webhosting provider and install Wordpress step by step. If you have no technical experience or consider yourself a 'noob' with script installation, don't worry. I will show you to set up your WordPress blog step-by-step. By far, WordPress is the best way to set up your affiliate site's infrastructure because not only it's naturally SEO-friendly, you don't have to know HTML to know how to edit your website!

Video 05 - Wordpress Settings and Must Have Plugins Running Time: 12 minutes 54 seconds Description: After installing WordPress, this is a walkthrough of WordPress essential settings, proven-to-convert themes to use (you can get them free by

the way) and must-have plugins for Search Engine Optimization. Video 06 - Adding Content to Your Website Running Time: 15 minutes 57 seconds Description: How to add content to your website and where to put your affiliate links for optimal conversion. In here we also talk about pre-sell story copywriting strategies to build relationships with your visitors that will skyrocket your sales. Remember that people only buy from those they like, trust and admire! Get this wrong and you probably wouldn't make any sales at all. Video 07 - Creating Pages and Widgets Running Time: 08 minutes 50 seconds Description: How to create pages and widgets to add more personality flavor to your website... overnight! Video 08 - Getting Your Site Indexed Fast Running Time: 05 minutes 56 seconds Description: Here's a myth I want to dispell and the proof is in this video. Instead of waiting for months for Google to pick up your site, here are little known methods to get your brand new website indexed in less than 7 days! (can be faster actually, but since Google indexes hundreds of thousands of new sites a day this can take a while... sometimes) The sooner you get indexed, the sooner you'll be climbing the ranks... which at this point can be done in 3 hours or less! Video 09 - How to Scale Up to a 5 Figures Per Month Business Running Time: 08 minutes 32 seconds Description: Here I answer some of the most common FAQs and how to crunch the numbers to scale up to a 5 figures per month business from affiliate marketing on ClickBank! "So You're Probably Wondering..." How much is this course? If you observe some of the guru launches in the last several months, their courses usually go for anywhere between \$77 to \$197. Yup, I used to buy into some of these courses in the past (not anymore now since I've wisen up and I've learned how to build a highly profitable affiliate business that's here to stay). Now I'm going to speak candidly. The methods in my course requires you to do some groundwork before you can start seeing results. If that puts you off, feel free to continue buying into those \$77 'magic pills'. I guarantee not only your tomorrow will never change, you will be come more broke by the day as you line up the pockets of other marketing 'experts'. I used to do that last time. And I committed myself strongly to stop abusing my own finances on short-lived tricks and being ripped off. But if you acknowledge that success requires you to work, then I've got a pleasant surprise for you. For starters, all the guesswork have been done for you. Like I've said, there is nothing to "figure out". I've already done them for you. Second, this course is going not for \$197... Not even \$77... But Just \$5.75! That's right. For less than six bucks, you can instantly tap into the same knowledge and expertise that generated me a healthy income for my affiliate empire... just stuffing cash into my ClickBank account! But just because this is below your usual "guru price" doesn't mean you should

discount the power. The other reason why I'm charging you cheap (when I should be asking for a higher price after my relentless search) is because if you like what you see in my course, and apply successfully, I guarantee you will like my other products too when I release them. Well there you have it. Place your order now by clicking on the orange button below. You will go through the process of purchasing my course online via the secure server and after successful authentication, you can download these videos immediately. Get It Now For Just \$5.75! P.S. This is not some videos I slapped together overnight. This is the result of my trial and error, and if you want to build a business that lasts - one that puts in money into your pocket on autopilot for a work done once - then your search stops here.
