While the music is playing you're cured of chronic fatigue. Free from boredom. Mind becomes active. You dream again and set your goals. This here's the mover. Guest producers on this release: Raggedy Andy - The 96, Stagmotta- What Gangsta's Do, Guest performers include: Karen Gerdine - Soul Music, Constance West - Up 2 Us Freestyle, Soul Plantation - You Really Feel It, Highlights: Head Lamps II (original) inspired by the injustice of the San Jose Police Dept. from a phony ass stop April 22, 2002 Another Day Another Dollar - First single released world wide and the positive feedback which encouraged me to never release unmastered material again. This song was mastered at Pappe E w/ Eujin. In fact this album was mastered at Pappe E. The quality came out good but I didn't like the sound at first because it seemed to flat. I took that master and did some touch ups at London Studios with DJ Daris and I liked the sound of it better. I then took anything off the release I wasn't feeling at all. Sometimes the mastering quality allows you to hear how sorry your performance was. I will either re-do or drop those singles. Up 2 Us Freestyle-

being true to the game I decided to leave the freestyle raw mistakes and all. Sounds a little odd when I mess up on words cause my brain moves faster than my mouth. But I liked the raw energy so thus it made this release. Please give feedback on how my music affects you. myspace.com/johnnyaafro or basswayrecords@aol.com
