Powerful Techno and Trance renditions - definitely worth a listen. 10 MP3 Songs ELECTRONIC: Trance, ELECTRONIC: Techno Details: The Richmond Mainframe is an independent synthesist creating Classical, New Age, MOR, Trance and Techno pieces for general listening, background music and underscoring. Classically trained, many of the the earlier works reflect this with strong string and piano arpeggios. In the Eclectica album the traditional Italian motif of Tuscan Spring is offset by Letting Life, a synopsis of a proposed underscore, while The Dream speaks for itself. The Voice of the Inner Light on the other hand, is written expressly for contemplative and joyous moods. The Lakota Sundown is a tribute to a late close friend who was the grandson of Chief Ironcloud of the Lakota Sioux. The latest works have been shifting into the area of Techno and Trance. Crystallix, and Technis on the Third Wave album are examples along with Village Voices.
