

Sectoral Systems Of Innovation

[DOWNLOAD HERE](#)

A broad and encompassing analysis of innovation in six major sectors in Europe. Innovation and technological change show different rates, types and trajectories depending on the sector in which they take place. Agents and institutions of a sector all exert a major influence on innovation. With contributions from nineteen experts in their field, this book proposes the framework of the 'sectoral systems of innovation' to analyse the innovation process, the factors affecting innovation, the relationship between innovation and industry dynamics, the changing boundaries and transformation of sectors, and the determinants of the international performance of firms and countries in different sectors. Innovation in a sector is considered to be affected by three groups of variables: knowledge and technologies, actors and networks, and institutions. In addition to the general framework, this book examines innovation in six major sectors in Europe including pharmaceuticals and biotechnology, telecommunications equipment and services, chemicals, software, machine tools and services. EAN/ISBN : 9780511207648 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Malerba, Franco
