A soothing, relaxing flute sound creating a deep and warm echo effect, plus waves and seabirds in the background hoping to bring a presence of being right there as I'm playing my flute on the shore. 15 MP3 Songs EASY LISTENING: Mood Music, CLASSICAL: New Age Details: When I wrote this album Venetian Summer with a triple echo effect, I had the Roland Sound System added to give the listener a feeling and presence of actually being right there with the breaking waves and seabirds flying overhead as I played my flute along the shores. To get the best listening experience from this CD, would be from a good home surround sound system. I've always tried to find different types of sounds with a technique away from the main stream styles. I feel that giving the listener an open, warm and peaceful experience of music is relaxing right down to the heart and soul.
