His most recent release "Strange Ships on a Blue Horizon" is a collection of instrumentals for six, seven, and twelve string guitars, with haunting, introspective vocals as well. In short "Strange Ships" is not just for guitar heads but for music lovers in general. Hiatt collaborates with cello, pedal steel, and other instrumentalists to create a richly orchestrated sound not found on many acoustic guitar cd releases. His musical debt to artists such as Leo Kottke, Michael Hedges, and even Joni Mitchell is evident without being guilty of being derivative.
