The power of the Web lies in the fact that anyone and everyone can access it. However, this should also extend to users with disabilities accessibility is about making websites accessible to those with aural, visual, or physical disabilities, or rather, constructing websites that don't exclude these people from accessing the content or services being provided. This is the right thing to do morally, plus there are legal requirements for web sites to be accessible in certain cases, such as public sector web sites.
