

Lifespan Development And The Brain

[DOWNLOAD HERE](#)

This book focuses on the developmental analysis of brain-culture-environment dynamics. The book focuses on the developmental analysis of the brain-culture-environment dynamic and argues that this dynamic is interactive and reciprocal. Brain and culture co-determine each other. As a whole, this book refutes any unidirectional conception of the brain-culture dynamic. Each is influenced by and modifies the other. To capture the ubiquitous reach and significance of the mutually dependent brain-culture system, the metaphor of biocultural co-constructivism is invoked. Distinguished researchers from cognitive neuroscience, cognitive psychology and developmental psychology review the evidence in their respective fields. A special focus of the book is its coverage of the entire human lifespan from infancy to old age. EAN/ISBN : 9780511217678 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Baltes, Paul B. - Reuter-Lorenz, Patricia A. - Rosler, Frank
