COUNTRY: Country Rock, ROCK: Roots Rock Details: Rock roots in the Lowlands. Inspired by Kevin Russell's (Gourds) statement that it feels much better to make the music that you always wanted to make, instead of trying to be hip happening, two guys started their private war with a 16-track recorder in a shack somewhere in the middle of Nether-nowhere. Their main ingredients are: poetic lyrics, loads of guitars and a good feel for each others music. Man, was Dif sweating on all this digital machinery that was supposed to record the finesse of years of inspirational meditation. And man, was JD Decker mighty tired after being a one man band. This CD here's the result. If you like rootsrocky country&rhythm stuff: BUY IT!
